## Who We Are

Honesty, integrity, and a commitment to long-term success drive fleetTEC's mission. Strong relationships with customers, partners, and employees are built through consistent results and kept promises. Every vehicle installation meets the highest standards through expert precision and attention to detail.

## What We Do

### Vehicle Installation Services

fleetTEC delivers precise, flexible vehicle installations tailored to commercial fleets. Services are completed at state-of-the-art facilities or through mobile teams, ensuring each fleet is equipped with the technology and tools needed to excel.

### Project Management and Deployment Services

Successful technology deployment demands meticulous planning and coordination. fleetTEC manages every step, from procurement to installation, with minimal disruption and seamless integration into operations.

### Hardware Consulting Services

fleetTEC provides expert hardware consulting to identify and implement durable, high-performance technology. Specializing in laptops, mobile devices, and advanced surveillance systems, the team ensures reliability in the toughest environments. Partnerships with top-tier manufacturers enable tailored recommendations that align with operational needs.

### **Technology Consulting Services**

Our technology consulting services help commercial entities overcome complex challenges. Experts assess current systems and develop strategies to enhance performance, minimize downtime, and reduce costs.

### **Fleet Consulting Services**

fleetTEC offers comprehensive fleet consulting, supporting organizations throughout the technology lifecycle. Services include project planning, staffing augmentation, and managed solutions, addressing both immediate needs and long-term goals.

### **Connectivity Consulting Services**

Our connectivity consulting services can design and implement advanced networking and mobility strategies to keep teams connected. Our expertise in mobile routers, wireless tools, and cloud-enabled systems enhances responsiveness, collaboration, and efficiency.

### Technology Buyback Services

fleetTEC's buyback services enable responsible recycling or repurposing of legacy technology, ensuring compliance with environmental regulations while freeing funds for future investments. This eco-conscious approach supports both financial and operational goals.

### Financial Services

Our financial services provide flexible IT financing, operational capital, and specialized funding options to help organizations manage budgets while meeting critical needs. Asset-backed financing and collaborative funding strategies drive growth and efficiency.

## What Customers Say About Working With fleetTEC

“Our officers were impressed by fleetTEC’s professionalism and pride in their work, but also they took the time to straighten up old work from previous installations.”

— Jim Raybon, Fleet Manager  
Support Services, Office of Professional Standards

## Let's Get Started
